

Credit Risk Scoring Simulator — Business Report

Prepared for non-technical stakeholders (Risk Managers).

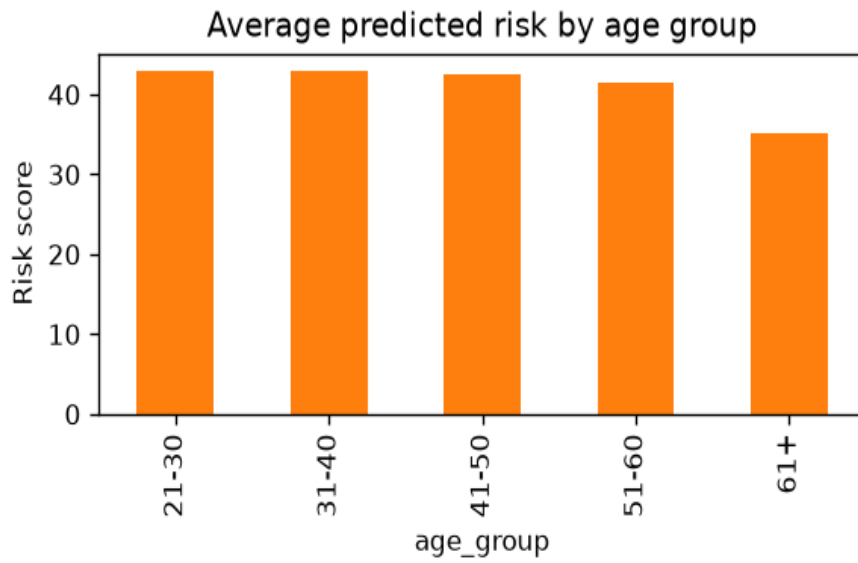

Headline results

Metric	Value
AUC-ROC (target ≥ 0.75)	0.793
Recall (defaulters caught)	71.3%
Precision	44.2%
Advanced model	xgboost
Test customers	6,000

Top feature importances

Average predicted risk by age group

Limitations

Built on synthetic data mirroring the UCI Taiwan (2005) dataset — not real customers and not calibrated to the Australian market. This is a portfolio demonstration, not a production lending system.
